

FORMAL COMMITMENT TO REDUCE CO² EMISSIONS BY 2030

MAFEL s.r.l. declares and renews its concrete commitment to environmental sustainability and the fight against climate change.

The company has set itself the ambitious goal of reducing its CO² emissions by at least 30% by 2030.

To do this, we will take consumption and impact data from 2025 as the base year for calculating progress.

This milestone will represent the fundamental guideline for the adoption of new technologies and for the optimization of all production and logistics processes in the coming years.
